

AZZADI KA AMRIT MAHOTSAV

This is a amazing day because we proud us while playing a great natak on the topic of “**no single use of plastic**”. The experience of this day is a great experience. This is held on 13th April 2021 at Kashmiri Gate. As we know on 13th April 1919 is a very harmful day for the history of India. Because on this day many innocent people were dead in a firing. We celebrate our festival of Baisakhi on 13th April every year in India. Same this a thousands of people were collect to celebrate Baisakhi festival at **Jallianwala Bagh** in **Amritsar**. In this ground only one entry or exit gate. **General Dyer** was attacked at this place with a number of soldiers less with weapons. At one gesture of General Dyer a thousands of people was shouted. This is not only a festival this is a festival along with a demonstration against **Rowlact Act** which is established by **British Government** . This act is established on **March 1919**. In this act the British Government had a power of arresting any people without any reason.

A important role is also play by Kashmiri Gate in Delhi. Kashmiri Gate was the scene of an important assault by the British Army during Indian rebellion of 1857, during which on the morning of **14 September 1857** the bridge and the left leaf of the Gate were destroyed using gunpowder, starting the final assault on the rebels towards the end of Siege of Delhi. We also see the sign of guns and bomb on the wall of Kashmiri Gate. In this rebellion Kashmiri Gate was destroyed very badly.

Many freedom fighters were sacrificed their lives for the freedom of India. So we have to respect their sacrifice for India. We never forget their sacrifice. And we take a oath to sacrifice our life for India when India will be in need. Many poeters were also play an important role to motivate the people of India for fighting the freedom of India.

Now we talk about the experience while playing a **nukad natak** on “**no single use of plastic**”. At first a speech was delivered by our own Cadet Harsh Pandey. This was a amazing speech which motivate our spirit. After that nukad natak is played by our own some cadets. This is a amazing a nukad natak which motivate our Indians to do no single use of plastic. After that our all the cadets were clean the whole ground of the Kashmiri Gate. We pull up all the rappers which is made by plastic. By the plastic the soil erosion take place. If we threw plastic here and there and after that the animals are eat them. The plastic was harmful for every living thing.

We all are feeling proud for us to play a this amazing nukad natak.
