

Firing selection experience

The life as a cadet is one of the best experience in my life. To be an NCC cadet is like being unique, dedicated, punctual & most of all I could say , an achiever. The firing selection for 28K bn was the one program conducted by the Unit after a long time because of facing the covid pandemic situation. Which was just a selection process but that day gave me an incredible opportunity. In my life, it was the first time I had fired. They have provided a 0.22 rifle for firing which was easy to control. I had reached there full of nervousness because I didn't know a thing about firing. But our Sir had cleared all before firing; they gave a demo firing & also built confidence for firing. Finally I fired my first bullet , which touched in the correct target that the center. Then I had finished my 5 rounds., I had received compliments from PI staffs because I showed a welldone performance. I had perfect grouping. Therefore I had given a second opportunity for firing. Also it was my best. Performance. But unfortunately I didn't got selection. Anyway that was a golden experience in my life.
