

What has NCC taught me?

"I am Shahana P.T, proudly says -
"A SW NCC CADET".

I always have the craze to join the NCC. Therefore, I had joined NCC when I belonged in highschool classes. After completing my class XII, I went to pursue my under graduation from Farookcollege, where I got the opportunity to be a part of 9 (K) Girls BN.

I enrolled for NCC and got selected, NCC is a great organization to join, it is like a lifetime achievement of some of the best qualities in the world.

When I have joined the NCC, I face a lot of problems but I did not give up, I have a hope in me that one day I'll make a difference - in me. It^{is} learned me to manage my self, ^{NCC} has motivated me to learn more about Indian Military.

NCC teaches me you will face problems when you wants to reach something but

Focus, Determination, Believe, Hardwork Never give up attitude of trying and trying again will definitely will make you to reach what you want.

It teaches me you have to do your work & instead of depending on others, it teaches me how to lead and command. It teaches me to respect every religion, race, caste without any discrimination. It teaches me

It taught me, to do what you want, passion & everytime you don't get the success in what you do but you will get the experience to make it correct and not to do against the mistake which you have done it previously.

It taught me how to interact people, to talk with unknown one and to make friendship with them.

It taught me how to make decisions, how to walk, how to talk, how to behave in front of elders as well as junior, friends and neighbours, relatives and how to solve the problems or issues if you get to face.

It taught me life is not about earning money, filling bank balances, the real happiness is lies - in your helping nature if someone is in problem and he/she want your help then you have to become the one who will solve their problems and become a role model for others.

It taught me if you want something higher level then must you have to give your best result either it maybe success or another chance.

~~It~~ NCC taught me a lot of things as the life lessons, I am really happy and glad to be a part of NCC.
