Directorate: NER.

World Environment day

By-XYZ

World Environment Day is observed on June 5 every year. The purpose of World Environment Day is to spread awareness about the threat to the environment due to rising pollution levels and climate change. The first World Environment Day was observed in 1974, giving a global platform for inspiring positive change in the environment. The theme of the first World Environment Day was 'Only One Earth'. The United Nations designated June 5 to be observed as World Environment Day after a call for saving the environment from possible damage due to industrialization drew attention.

To take various prospective measures to avert the effect of global warming. since we all know that global warming is the root cause of the ruin of our environment. therefore it is our

duty to protect our environment. And stop all the exploitation that is destroying it. because in the end, it is our basic need for our survival and our generations ahead. on the world environmental day, we will take a day off from our work. and join various compaigns to spread awareness about environment protection. moreover, we all plant small samplings in a barren land so that it may grow and flourish in the land area after some years. Also we take part in various processions to make people aware of this day.

World Environment Day is very good and it is our duty to nurture plants and trees. It is our responsibility to make the society beautiful by trying to grow trees in the society without cutting down the trees.
