#### Article - Coronavirus

Coronavirus disease is an infectious disease . People who fell sick with COVID 19 will experience mild to moderate symptoms and recover without special treatment.

The virus that causes Covid-19 is mainly transmitted through a droplet generated when an infected person coughs, sneezes or exhales. These droplets are too heavy to hang in the air

and quickly fall on the floor or surface. You can be infected by breathing in the virus if you are close to someone who has Covid-19 or by touching a surface.

By this almost 16.9 karo people are affected and 35.1 lakh are dead.

- Stay safe and stay inside.

- Wear mask while going outside.

- sanitize your hands.

- wash your hand properly after coming back home.

- don't shake hands
