

## My ncc experience

The life of a cadet is one of the best experience one can ever have. My ncc experience was very good. I have any idea about ncc. But after I joined ncc I experienced so many thing. In this pandemic situation selection was held online. The online selection was a new thing to me. That is when I did parade for the first time. The interest to join the ncc was came from my brother. He was also in ncc before. After I joined came to know that motive of ncc is unit and discipline

In ncc cadets will do so many social work like volunteering, cleaning etc. Ncc shows how a life of an officer in the indian army is. Institutional training, camp training, social services etc. are the training activities. The best part of the ncc is attending training camp. Ncc cadets have so many responsibilities on the special occasions like independence day, republic day etc.

We the cadet of the ncc resolve to be discipline and responsible. Ncc teaches us how to be a good citizen and it also teache punctuality, hardworking, and dedication. We work without selfishness for others. The lessons I have learned from ncc will never forget in my life.
