

Ecosystem

I wish to write about the the Earth on we live,Ecosystem,the different problems facing Ecosystem, solutions to these problems etc. think ecosystem is the interaction between the environment and the living organisms. Environment is the area where living organisms live. Ecosystem is the community where the biotic and abiotic elements interact with each other.

Ecosystem provides habitat to wild plants and animals. It promotes various food chains and food

webs.It controls essential ecological processes and promotes lives,including in the recycling of nutrients.

The major current environmental problems are pollution, soil degradation, global warming, over population, natural resource depletion, generating unsustainable waste, waste disposal, deforestation etc. Our environment is constantly changing. So we need to

become increasingly aware of the problems that surround it. I think it is a massive influx of natural disasters, warming and cooling period, different types of weather patterns and much more. Global warming has become an undisputed fact about our current lively

hoods; our planet is warming up and we are definitely

part of the problem.

I think the simple magic to protect our ecosystem is 3R- Reduce ,Reuse and Recycle.

- Be a volunteer for clean ups in our community.
- Educate.....
- Conserve Earth.....
- Cut down on what we throw away.
- Choose sustainable.....
- Shop wisely.
- Use long-lasting light bulbs.
- Plant a tree.

- Saving natural resources.
- Reducing pollution.

- Avoid taking cars as much as possible.
 - Using reusable bags.
 - Save soil and water.
 - I shall use recycled and eco-friendly products such as paper or jute bags instead of plastic bags.
- Protecting our planet starts with me.

The healthy ecosystem will help us to

- Infections free life.
- Increased self confidence.
- Higher productivity.

- Sense propriety.

- Lower chance being stress.

Finally I conclude with a pledge “I will try my level best to conserve my nature, environment and ecosystem forever.” And I understand “What I got from my ancestors that I should give to my future .”
