

NCC : THE PERSON I AM NOW

NCC changes everyone. 3 years are enough to impart new skills and identify your weaknesses. Here is how NCC changed my personality. I haven't been part of NCC until I came to college. My 1st year is all about passion, patience and courage let's elaborate this in details Passion is not just a superlative word in NCC because in this organization you should prove yourself by Training by Knowledge and by Team spirit. Patience means how much you bear in Training time and how long you could control your nerves and Never Ever Give up. Courage to reaching the height of your goal, Courage to be the part of NCC till last breath of life, Courage to not leave the training ground.

My 2nd year is all about Building Confidence, Gain Leadership qualities, Honesty and discipline let's go through them Building Confidence is the one of the biggest challenges of my life. When I joined the NCC I was not able to give introduction of my self even not able to discuss some matters with my friends, but not with my fellow cadets . I am happy to tell you that today I not only able to speak in front of them but also able to lead my cousin cadets and juniors. Bringing leadership quality is a very hard job. Some has to be learned or developed and for some it is natural. Being a Cadet with rank I always had responsibilities and I believe I was able to do my job. NCC not only teach you about drills but also about other social factors, meaning if service etc. I also learned to handle documents which was new to me, Since I joined NCC I was developing myself in all aspects of life.

There is nothing much physically happened in my 3rd year because of the pandemic and I was doing my job as a CSM . NCC is something that is always close to me and I can proudly say that I am an NCC Cadet. I am always thankful to NCC for making me the person I am today.
