I would like to share my experience being an NCC cadet. Being an NCC cadet, I understand the power of unity and coordination from the first day of training. It was a motivating and enthusiastic feeling for me. So being an ncc cadet is like being an achiever in life. Ncc conducted many programs for the society. Through that learnt about the importance of social service in the society. NCC also conducted blood donation camps yearly, which supports Life of people. The most essential part of NCC is that we will learn to build team spirit and comradeship with each others, from eating to sleeping. NCC will help you to inculcate the sense of discipline, smartness, self confidence and boost our moral. Training will help us to shape ourself both mentally and physically. NCC will groom us to be a good leader and a responsible citizen. Above the comradeship and team spirit, there in NCC we will achieve both of this.

I was an ex Ncc cadet during my school days. It was a good experience during joining Ncc during schooldays. It was my wish to join NCC like Largest uniformed organisation. Seniors during school days helped me in understanding about the importance of being a Ncc cadet in the Society. At that time there was drill on the evenings. Then there was a 7day camp held at NIT Campus Calicut. That was a good experience for me. We stayed in the hostel. There was drill, classes, cultural programs etc. That was most unforgettable moment I had there was a chance for firing. After leaving school joined college first thing to know about college was Ncc Unit. So now I have been in the NCC for more than 2 years. That experiences I have experienced was most valuable for me in my life. NCC increased the discipline in me through various individual activities. NCC taught me to be in an protect our environment, but also taught how you can react to various kind of people. NCC brings unity, discipline, physical fitness, awareness in cadets. NCC teach me how to respect every caste, religion, colour without any discriminations. It also teach me life is not about learning money, but there all happiness is lying in our helping nature. If anyone has problems in their life and if they need our help we have become the one who can solve the problem. Thus we can make their problems to happiness.

Ncc helped me to find a place within friends and teachers. Ncc also helped me the importance of discipline throughout the life and also intelligence, confidence and coordination. Training camp also helped me physically and mentally strong. The 10dayscamp was reduced to 3days cadre due to the pandemic situation. that was held on my college and its one of the best camp I had in my life. By being an NCC cadet, was a motivating and amazing feeling for me. I had good memories with me in my NCC, mostly from camp.

Even during this pandemic covid19, We havent feel any break from NCC, since we were always engaged with NCC programs like social activities, planting trees, online programmes, and also the celebrations of important days. The experiences that I had from NCC is most valuable and unforgettable. The experiences that a cadet get from NCC can inspire them throughout their life. I am proud to be an Ncc Cadet.

Jaihind.
