

FROM SQUAD POST TO GOOGLE MEET

As we all know our country is now seriously effected by the Corona virus. And it also effected us very badly. our NCC selection and it's document work had completed in the month of November 2020. And we all are very excited to be a part of the National cadet corps(NCC).also very much excited to do NCC drills and it's parade and all the workouts.

But then the situation was started to effect very badly. The cases of Corona virus and the death of the patients was started to increase. On that situation our ANO Ashraf sir said that we have to stop our drills and all our NCC related things because of Corona virus.

Then our government passed the lockdown we all stay in our houses for our safety and for our society's safety. The months were passed very quickly and our NCC drills and all other works were pending. Then our ANO Ashraf sir asked that can we start our classes in the Google meet. All of us accepted because our drills is not happening and it's won't happen because the situation is very worse. We have to start our classes on Google meet.

Then we fixed the date and the class has started and the class was very good and very understandable. We studied what are the importance of NCC in the society and in the country. And we had 2 or 3 classes on the Google meet.

But the Google meet is not effective than the physical class like face to face interaction and didn't got the feeling of attending a class. It may be because it's my first class. There are a lots of advantages and disadvantages on taking the class in Google meet . The advantages of taking the class on Google meet we all are safe in house and won't affect the virus and it's symptoms. But it also have its own advantage because we had lost our opportunity to express our strength and interest in the drill section and in the parade section.

It is a small write-up on the experience of mine from squad post to Google meet..
