

My NCC EXPERIENCE

I would like to share some of my thoughts that I have experienced in NCC.

* Firstly I would like to say that NCC is not easy, we have to work hard very hard. When I got selected, I thought I can do it. But actually I don't know its depth. So when the parades are started slowly it becoming tough for me, and I am in completely defferen mode. Slowly I have developed my potentiality and self-confidence.

Really 'NCC' created a much greater impact on me, like following time, and I got the value of time. It created discipline in me, It made to think about our nation. It gives me joy and happiness.

It give me friends. A part from all this NCC made to learn many things, that had not even in teach at any schools. I have learned Respecting our national flag and antherne. In each and every second of my parade I have enjoyed a lot. Culture provide us some sort of relief and good enthusiasms in us. So through NCC we can eliminate the specialisation thoughts, from our country
