

The day was very informative. It was a fun day to ~~see~~ attend. We had the opportunity to build up our knowledge for our lives. ~~Over~~ A few of our cadets got the opportunity to put out fire caused by a leaking gas cylinder. ~~So~~ Others had the opportunity to administer CPR on a ~~dummy~~ mannequin. We were informed about the do's and don't's. We inaugurated the Disaster Management Club. It was inaugurated by our honorable district collector. They talked about the importance of mitigating disasters properly and preventing them. We were taught about basic first aid. The Operation of a fire extinguisher was very detailed and notified us to be important. The class as a whole conducted on behalf of the opening of Disaster Management Club was informative, interactive and well executed. We could ask questions and they would be answered by the guests. All kinds of doubts relating to the topics were wonderfully cleared. I was also given the opportunity to deliver the vote of thanks on ~~behalf~~ one of the classes.
