

Definitions #2, add l. **“Publish”** means making the data available for public use in any format whatsoever, including but not limited to analog, digital, print, audio, video or multimedia format, and through whichever medium, including but not limited to any forms of wireless diffusion, television, radio, internet or physical media.

#4c. **Non-endorsement:** The User must, along with the attribution, specifically mention that the data provider does not in any manner endorse the user or the specific use of data made by the user.

#4ee. **Non-proprietary character of published datasets:** In the event of any User adapting the data, either in itself or through combination with other data, and subsequently publishing its adapted data or dataset, the User hereby undertakes to license such published data or dataset to any persons desirous of using it on the same terms and conditions as the present open license.

The above condition on subsequent licensing is not applicable to situations where: a) the User has not published the adapted data or dataset and has kept it private; or b) the User has included the adapted data or dataset within a product or software application for the purpose of commercial / non-commercial use.
