

Dear sir

We are thankful for giving the opportunity to express our Views on saving of Fuel for one day in a week

In this context I would like to request our fellow country men to think and to get self motivated about saving of Fuel for one day.

My suggestion are given below

- 1) Lets use Public transport on weekly holiday to meet our personal needs. Lets get self motivated by thinking in our childhood days most of us do not have cars or Two wheelers we used to travel in buses. So lets g to our childhood memories and enjoy travelling in buses
- 2) All the week days we will be busy in work and very little time for physical exercises. So lets take oath not to use motor vehicles on Sunday but will walk on that day to meet friends, and for house hold work
- 3) Lets save our environment with out pollution by saving fuel on one day
- 4) Lets plan some social activities on Sunday to get engaged serving people rather travelling on roads aimlessly because we are having vehicles
- 5) Lets use bycycles on Sundays by which we can get health and we can also save fuel
- 6) If there are 3 -4 cars in a house use only one car if possible for entire family if it is essential
