REPORT OF THE COMMITTEE FOR
RATIONALIZATION AND OPTIMIZATION OF THE FUNCTIONING OF
THE SECTOR SKILL COUNCILS

DECEMBER, 2016

VOLUME –III
MAPPING OF NATIONAL CLASSIFICATION OF OCCUPATIONS, 2015
WITH NATIONAL INDUSTRIAL CLASSIFICATION, 2008

Constituted by
MINISTRY OF SKILL DEVELOPMENT AND ENTREPRENEURSHIP
GOVERNMENT OF INDIA
NEW DELHI
Explanatory Note

This mapping of National Classification of Occupations, 2015 (NCO 2015) with National Industrial Classification, 2008 (NIC 2008) has been done by Directorate General of Employment under the Ministry of Labour and Employment. NIC 2008 is based on and is compatible with ISIC Rev. 4. Similarly, NCO 2015 is based on and is compatible with ISCO 2008.

ISCO 2008 is a four level hierarchically structured classification that allows all jobs in the world to be classified into 436 unit groups. These groups form the most detailed level of the classification structure and are aggregated into 130 minor groups, 43 sub major groups and 10 major groups, based on their similarity in terms of their skill level and skill specialization required for the jobs. This allows the production of detailed internationally comparable data as well as summary information for 10 groups at the highest level of aggregation.

The ISCO is a useful model for the development of National and Regional Classification of Occupations and can be directly used by the countries in specific decision making and action oriented activities such as those connected with international migration or job placement. This classification is used by governments and companies for activities such as matching job seekers with job vacancies, educational planning and the management of employment related migration.

It is a very significant work and has far reaching implications for India. The NIC 2008 which is based on ISIC Rev. 4 classifies the whole economy into 21 sectors and accordingly, we have recommended creation of 21 SSCs which encompasses all the activities included in the 21 sectors. The existing 40 SSCs have been rationalized accordingly. NCO 2015 which is based on ISCO 2008, divides all jobs into 436. If a country wants to subdivide any job into two or more smaller unit groups or by providing more detailed occupational groups, it can be done in the fifth hierarchical level in NCO 2015. The NCO 2015 has mapped all the jobs with the ISCO 2008 up to four digits. However, they have committed a mistake in the last four digits as they have taken the QPs/NOSs developed by the existing SSCs, which are very narrow in nature and there are lots of overlaps. What is needed now is that the SSCs, DGE and NSQC should work together with the industry and create 5 digit QPs for 436 jobs listed in the ISCO 2008.

(i)
This classification has the potential to transform the country. If we are able to develop QPs for 436 jobs as defined in the ISCO 2008 and adopted by NCO 2015, the persons trained therein will not only be able to get employment in India but also anywhere else in the world. If some jobs are not available in India, we can leave them and if some jobs have little variation here and there, we can contextualize them according to Indian requirement but it has to be done by DGE, SSCs, and NSQC in consultation with the industry concerned. However, the basic reference point will be the standards defined in the unit group concerned. This work cannot be entrusted to the consultants but should be done by the experts of the industry concerned. It will ensure compatibility of national standards with the international standards. We may call them National Competency Standards (NCS) in place of QPs and tasks included in them as “Competency Units (CU)” in place of NOSs. There will, therefore, be no question of any QPs/NOS being narrow or overlapping as they will be aligned to international standards. This nomenclature is better and focuses on “Competencies” and is being used by countries like South Korea and Germany. The biggest advantage will be that persons skilled according to these NCSs will be of international standards which can transform the Indian skills landscape forever and realise the vision of the Prime Minister to develop India as the “Skills capital of the world”

The current efforts being made by the NSDC/MSDE to align our standards with different countries is just not required. Once we align our national standards with the international standards. They will be comparable or superior to any other national standards as we would have benchmarked our national standards with the international standards.

Another significant point which has emerged from our analysis is that most of the SSCs elsewhere in the world are not aligned with international standards and, therefore, if Indian SSCs follow the international standards, as has been recommended by the Committee, they will be the best, internationally comparable and will become reference points for rest of the SSCs anywhere in the world.

</table>

Glass & Ceramics

Manufacture of articles of porcelain or china, earthenware, imitation porcelain or common pottery, including earthen statues.

Glass & Ceramics

Manufacture of refractory bricks, blocks tiles and similar refractory ceramic constructional goods.

Glass & Ceramics

Manufacture of refractory bricks, blocks tiles and similar refractory ceramic constructional goods.

Glass & Ceramics

Manufacture of refractory bricks, blocks tiles and similar refractory ceramic constructional goods.

Glass & Ceramics

Manufacture of hollow glassware (bottles, jars etc.) for the conveyance or packing of goods; Manufacture of laboratory or pharmaceutical glassware; Manufacture of table or kitchen glassware; Manufacture of measuring instruments such as thermometers etc.

Glass & Ceramics

Manufacture of glass in primary or semi-manufactured forms (such as sheets & plate glass) including mirror sheets and wired, coloured, tinted, toughened or laminated glass.

Glass & Ceramics

Manufacture of millstones, sharpening or polishing stones and natural or artificial abrasive products, including abrasive powder or grain on a base of textile material, paper, paper board or other material.

Glass & Ceramics

Manufacture of millstones, sharpening or polishing stones and natural or artificial abrasive products, including abrasive powder or grain on a base of textile material, paper, paper board or other material.

Glass & Ceramics

Operation of sand or gravel pits, basalt / porphyry, clay (ordinary), crushing and breaking of stone for use as a flux or raw material in lime or cement, manufacture or as building material, road metal or ballast and other materials for construction.

Handicrafts

Manufacture of articles of porcelain or china, earthenware, imitation porcelain or common pottery, including earthen statues.

Glass & Ceramics

Manufacture of millstones, sharpening or polishing stones and natural or artificial abrasive products, including abrasive powder or grain on a base of textile material, paper, paper board or other material.

Glass & Ceramics

Manufacture of ceramic products n.e.c.

Glass & Ceramics

Manufacture of prepared pigments, prepared opacifiers and prepared colours, vitrifiable enamels and glazes engobes and similar preparations of a kind used in the ceramic, enamelling or glass industry.

Handicrafts

Manufacture of millstones, sharpening or polishing stones and natural or artificial abrasive products, including abrasive powder or grain on a base of textile material, paper, paper board or other material.

Handicrafts

Manufacture of clinkers and cement.

Glass & Ceramics

Manufacture of ceramic products n.e.c.

Glass & Ceramics

Manufacture of glass fibre (including glass-wool) and yarn of glass fibre; nonwoven glass fabrics, mats, boards and similar non-woven products.

Glass & Ceramics

Manufacture of glass in primary or semi-manufactured forms (such as sheets & plate glass) including mirror sheets and wired, coloured, tinted, toughened or laminated glass.
