NIEPP - CBSE Entrepreneurship in schools

1* I am an educator in a private school I feel that I would taking very initial role in promoting the role to encourage schools to introduce entrepreneurship training programmes in the schools.

2* I strongly believe that the young children nowadays are smart and determined so they can be able to make themselves strong in the society. If they are trained as entrepreneurs they need not to wait for someone's help they can empower themselves with the knowledge and skills they gain through this training.

As an Educator I have practice this in our school students take up the products designed the products and made ready for sale. This experience changed the confidence levels in the students they felt they were able to empower themselves.

4* The language would be best if it could be their mother tongue.

5* I don't find any issues in the implementation of the programme it would be pleasure to the students if it would reach to every student who deserves the quality education with lot many reforms.

It is a great initiation by the ministry of education in introducing such a wonderful platform for the students to empower. I sincerely feel happy and grateful to come up with my opinion.

Thanking you
