

Respected Uncle,

Pranam.

Your life teaches me the journey of a Normal Young Child to the Top Most position of a Country like India.

I am Aryan Agnihotri, a student of class -7, continuing my studies in DAV Public School, Unit-VIII, Bhubaneswar.

During Van Mahotsav week, since last 3 year I have been distributing 100s of saplings and hand drawn public awareness paintings to people in traffic joints with the help of my parents. I request people to plant the saplings somewhere near to their home and take care of the plants for at least 2 years.

I tried to reach peoples from all sectors of society. I have attached some photographs of the occasion. This year I got an Invitation from His Excellency Governor of Odisha. I gave him a Sapling of Ashoka Plant.

Govt is doing a lot of work to conserve our forest, planting of trees etc. But unless and until we student mass are not aware, this is not going to a success.

Green Scouts.

I have a plan for this. I want to have a team of volunteers in the name of GREEN SCOUTS in each school. The members shall plant trees and protect them too. Also they shall aware students of different schools to be part of this mission.

My Slogan for this is ***"LET'S MAKE OUR OWN OXYGEN"***.

Need your kind permission and instruction to all the stakeholders to help me establishing Green Scouts in each school.

Yours obediently

**Aryan Agnihotri
Class VII (A)
DAV Public School, Unit –VIII
Bhubaneswar Odisha**
