

To Sri NarendraModi Honourable Prime Minister of Bharath.

Pranaams

TO MAKE INDIA AS A WORLD REPUTED MANUFACTURING HUB IN ALL SECTORS

To build Brand INDIA in Manufacturing sector and to make India as a manufacturing Hub following

Steps can be taken.

Brand and customers retaining Rankings – Service efficiency, Hardware and Cabling Technologies upgrading for faster Net for work from Home, Digital Citizen services etc.

Many new Technologies coming but India is depending on china for innovative products, new technologies. E.g. Electric Two wheelers motors Equipment, 5G Tech (HUWEI etc)

So Govt need to encourage R&D in such all developing Technologies, Solar power, Telecom infra TRANSPORT SECTOR, Road safety , Hydrogen powered Transit systems , Sustainable Mobility solutions, Pollution control Technologies, Water treatment systems , Green building, Eco friendly Architecture and Factory designs , Overhead Electric Truck lines connected to Solar and Wind power units etc.

Country wide - 4 or 6 Zones to be formed to make mandatory 6 firms to work in tandem to provide IPTV, Digital Education TVs, Data Broadband services , Dish TV services, OPTIC Fiber services to every villages.

So Govt can invite TATAs or BSNL, Any others to take over with 50 % waiver of past dues to all Telcos.

IF new players like L&T etc take over Vodaphone idea cellular Govt can waive 20% dues with

Below policies to expand it in major new Technologies 5G tech etc for clearing Bank Dues.

And to encourage BSNL MTNL etc to venture into above Broadband, city cable IPTVs, 5G technologies,

Since in all cities only single firm is monopolized the Broadband services, TV cable or net cable business

And not allowing competitors to give proper service to customers from different companies (ACT, HATHWAY) so Govt need to direct municipalities, Panchayats to provide basic infra like proper cabling Ducts along Road side footpaths, along Road Medians with proper infra for multiple Firms Broadband and IPTV Cables for robust Digital India and BharatNet project for connecting all Villages for better Citizen services.

CONTROLLER OF CAPITAL ISSUES: to be revived to check unscrupulous elements fixing unreasonable high prices and disappearing later 2 – 4 year after IPOs,

Many Startups, small manufacturers not finding investors, or working capital in required time.

Small Firms Capital Market Exchange –

Innovative Investment Bonds cum Convertible debentures for such Firms which have growth prospects

So a Capital Infusion exchange for Small & Medium Firms can be established with 50% collateral guarantee (land, assets of Promoters) to give 2 times value of Assets as Loan for Working capital for 1 year at very less interest. SME exchange can be setup to list SME shares as in BSE, NSE with lock in period of 3 years for encouraging small firms, small manufactures of EV two wheelers, Electric Autos, OEMs etc.

All IIMs can be made a part of BSNL, LIC, BHEL like PSUs as Advisory Directors through a Panel of Professors to learn about Revenue leaks, to study about options to make them worldwide competitive firms, efficient organizations to make them High Revenue generating Public sector firms for Foreign exchange and employment opportunities generating.

MAKE INDIA A COMMUNICATIONS SUPERPOWER (Technology with RightCharacter building networks AI , lot IN Telecom to block obscenity , vulgar content in internet to save children and youth)

TELECOM INFRA WITH LESS RADIATION, IMPORTANCE TO OPTIC FIBRE NETWORKS IN CITY PLANNING THROUGH ROAD SIDE PLANNED DUCTS

Forcing Govt PSUs to function more competitively and dynamically for needs of citizens and World Market requirements.

BSNL MTNL need to compete with private players so regular review of Employees , officers working style need to check , and a target of monthly 2 – 5% subscribers increase collectively to every BSNL ZONE or BSNL District Head office. Every BSNL, MTNL staffer can be given target of adding 10 new subscribers every month else 5 – 10 % salary cut can be done since all such BSNL staffers are unionized and not giving any service to people in required time.

A new firm **BSNLPlus** can be floated with new young engineers, new marketing team, new Technology enthusiasts to improve subscriber base and optic fiber connectivity, broadband connectivity, Doordarshan DISH TV services subscribers, Digital Education connectivity to schools, colleges, Universities, Bharat net etc – which would be purely merit based and efficiency, and key result oriented as per target. (To make it an ideal performing PSU model)

Urban planning & Rural Development policies can include Optic fiber networks, low radiation Mini Telecom & Satellite Link receivers for Amplification of Wi-Fi, Telephone networks

Road side Footpaths, Road designs can include Ducts for cables, power lines etc separately along with storm waterlines to stop repeated digging of roads in urban plans.

Banking Technology upgrading for seamless Business Transactions

IoT Revolution with R&D in IITs and Urban planning to avoid Urban flooding , Road Accidents, Traffic jams etc to develop holistic Urban Transit networks ,cycling infra, AI powered CITY Bus services for efficiency.

ICT & IoT (internet of Things) Excellence through R&D : Govt need to encourage R&D in telecommunications

Secure Networks (non depending on www internet lines) with in country for citizen services,

Bank payments, UPI NEFT RTGS Payments , Rupee card like All India Transit Card for use in Trains, Railway ticketing , city buses , Metro Rail, and OLA like Taxis

(Rs.1000 deposit for local citizens, Rs.5000 for Foreign Travelers)

IITs & some Engineering Colleges can be made part of this Technology mission for integrated Bharatnet for such above digital transactions, citizen services, Electricity bills, smart metering, solutions to plug out pilferage of Power, electricity, water etc.

Aim: To encourage Technical skills and to make some world reputed IoT Firms, Telecom Technology

So INDIA wont depend on Chinese and foreign firms for 5Gtech etc.

MANUFACTURING HUBS , AIRCRAFT CARRIER SERVICING , AIRCARGO HUBS ,Refuelling centres

CONTAINERMANUFACTURING , HI SPEED TRAINS AND RAIL COACHES OF INTERNATIONAL STANDARD

MANUFACTURING

Government need to establish 6 – to – 9 Special Manufacturing zones for improving quality manufacturing from office stationery to Railway Engines and Hydrogen Fuelled ships and Zero Emission Buses.

These new Special Economic Zones and Manufacturing Hubs can be established in backward districts near Airports, Ports to make INDIA as international Logistic HUB combined with Manufacturing Hubs.

E.g. Donakonda – Prakasam District, Anantapur District in Andhrapradesh, Latur Maharashtra, and Kalahandi Orissa etc can be developed as Ecofriendly Manufacturing Hubs by providing Road and Rail links to nearby Seaports, Airports.

A New International Transit and Logistic Hub can be developed if Donakonda- (near Guntur) AP, is developed as a big Logistics Airport with setting up exclusive WareHouse Hubs, Manufacturing hubs of Automotive OEMs, Solar power units, 5G tech Telecom infra hardware, COMPUTER HARDWARE & Silicon Chips Processors, Electronic hardware etc can be encouraged by reputed world firms to setup units, or collaborations with 6 years Tax free periods to make India as a Manufacturing HUB.

So If world Reputed firms like SIEMENS, SCANIA , HUNDAI (Railway coaches) Bombardier etc Railway Engine manufacturing firms , Alstom, Hitachi Mitsubishi etc can setup Manufacturing hubs and export the products from nearby Airports, Shipports at lesser Tax rate for 4 years , this will generate huge employment opportunities in country also Skill development through collaborations, allied OEM supply units etc.

These Manufacturing Hubs, SEZ, Electronics cities, Computer Hardware Hubs Textile hubs can be interlinked with Dedicated Fright corridor through extended Rail lines from Main lines to link them to ports, Airports etc ,

Govt need to setup a Logistics Study Group to develop alternative routes, Exclusive Logistics development routes that substitute to world routes, innovative Transit Systems to link Shipping Containers through rail and Air Cargo through India between Australia, Singapore, Malaysia etc towards Europe, America through interchangeable Transport Hubs to shift containers of goods from ships to Trains, trains to Air cargo

For example New Cargo terminals at East coast can have such facilities so cargo can be fastly shifted to Air cargo or Trains towards western seacoast ports

So India can allow Cargo Enterprises that can own a fleet of ships and Goods Trains, Cargo ships to do this type of Fast Cargo, Goods transport between Continents.

This will enable international firms to find alternative routes for Suez Canal as last year some ship failed by struck in canal sand and caused huge loss to shipping industry.

So Govt can establish Hydrogen fuelled Shipping Hubs, Hydrogen fuelled Intercontinental Train Systems between East coast ports towards west coast ports and interlink through African ports also through

MoUs with such countries by helping them to setup such integrated ports, logistic hubs to reduce shipping transit time, goods transit time between east part and West part of world by interlinking Sea routes – train routes – air routes through India by establishing such Transit hubs.

This can be alternative to china's BELT (SILK ROUTE) - So a National Logistics Board can be setup to develop such export oriented manufacturing hubs to integrate with international hubs through INFRA development, policy changes towards labor viability .efficiency, labour welfare schemes like Satellite towns for Workers, labour in such ports and Transit hubs with all kinds of Medical and Education infra at Govt cost. This will definitely boos the India's manufacturing skills, exports, employment opportunities etc

AMAZON, FLIPKART, Swiggy Zomato etc online sellers are increasing unnecessary packaging plastic waste, so make a Swachhbharat Tax as below.

Rs.50/- Swachhbharat Tax on Value of Purchases above Rs.500/-

Rs.100 for Value of order 501-5000 ,

Rs.250 for 5001- to 10000/-

RS.500 for value above Rs.10, 000/- - 1 lakh

Rs 1000/- for purchases above Rs.1 lakh

Better Telecom Services for Rural Poor and common man

Many Firms like Airtel , Reliance Jio are cheating public by collecting Data packs of Rs.125 to 399 (22 days to 84 days) but not providing any proper signal and people are deceived at these firms due to poor signals.

Govt need to increase Broad band infra, optic fibre infra through Quality Telecom structure so more competitors need to be placed in every City and every district.

Also Rs.300/- plan for 365 days incoming free, and 10 minutes outgoing per day plan to be introduced

Or Rs.30/- plan for 1 month incoming free – 10 minutes outgoing calls free for every operator required.

More importantly Govt need to block all dirty ugly content like child porno, porno sites in all Social media like Youtube , Twitter Instagram , Telegram etc for this a new Law can be made as pornography viewing is a crime and ISPs need to be ordered to block it if any customer complains such sites.

Govt can ban YOUTUBE, TWITTER, INSTAGRAM TELEGRAM etc sites for 18 months till such action taken by them.

ATMANIRBHAR Agriculture IN SPICES, DRYFRUITS – oilseeds

Horticulture , Spices parks around Aravali hills , artificially created gardens around Indira canal in Rajasthan , Forest adjacent areas in Maharashtra, Andhra, North Eastern states like Assam Tripura etc , Himalayan footsteps in Uttaranchal uttarpradesh Bihar etc

ICAR, CSIR And Botanical Studies, Agricultural Universities need to be given a Task of developing suitable Farming methods to grow Apricots, Figs, Green and black raisins, Spices like Biryani leaves (Tej patta), **aromatic asafoetida plants and its manufacturing**, Sago trees and Dry fruit Clusters along forest areas of Punjab – Rajasthan – Gujarat – Madhyapradesh – Maharashtra, Telangana, etc and Eastern States for encouraging import substitute Fruits, Spices production.

Spices that are being imported can be cultivated in above suitable localities by Agriculture research projects by intergrown Horticulture crops, Coconut tree clusters along Thar Desert areas by artificial ponds, 5 to 6 km wide tree belts along Desert borders to stop spreading of desert into fertile land.

For this a Rs.500 crore budget can be given directly , to help interested Farmers organizations FPO , suitable Districts agriculture departments to adopt such spices plantations as a part to improve the farmers income in backwards districts , arid zone districts like Anantapur, Latur, Rajasthan etc for such farming and nurseries and Research projects.

Above Plans can be interlinked with Farmers income doubling schemes – through allied rural agriculture activities like Local breeds of cows, local variety of Hens and chicken for Eggs, Ducks etc in every village, every Tribal Village through creating a Supply chain to make these products reach nearby Towns cities through Electric Bikes, Electric cargo bikes.

-

Universities, Schools, Residential Schools can be encouraged to setup Active Youth Associations

To do swachhbharat, NSS, plantation drives etc.; they can setup Cycling Rental Systems in and around their Educational Institutes to encourage Cycling for health.

Govt can declare some days as follows

National Project Management Day (Satyasai Hospital construction done in 1 year , which would have taken 7 years as regular situation)

National Productivity and Work Efficiency review Day (Mokshgunda Visweswarayya Retirement Day)

National Traditional Dress Day : (EswaraChandra Vidyasagar jayanti)

National Public Transport Month (November 26 to December 26th) to reduce Airpollution and to encourage public transport

National Cycling Month

Every month Wednesday Friday Saturday can be declared as Public Transport cum Cycling Days to encourage Govt and private employees to use Buses, Metro rail or cycles to reach work places to reduce pollution and make India FitBharat.

National Digital Working Hours to be declared as 7 am to 7 pm for IT working people

And ISPs can be ordered to switch off regular Net data after 9.30 pm to 6 am for OTT, DIGITAL ENTERTAINMENT STREAMING, TV networks etc as many people, children are becoming addicts to

Digital screens, games in mobiles so as a policy Net speed reduction after 9.30 pm to be mandated nationwide with Data usage limits by Telecom firms

Any 24x7 Data using offices can get permits for such operation thru

URBAN PLANNING FOR CLIMATECHANGE, FLOOD RESISTANT CITIES

ROADS QUALITY AND SAFE DESIGNS OF ROADS

Every year Thousands of crores of Tax payers funds going into drains by poor quality, poorly designed Roads in cities as they soon battered, patholed, damaged in rainy season.

Govt need to make mandatory skill training on proper Roads construction, slope making for rain water flow to sides into storm waterlines, proper design roads with quality

Make mandatory qualified trained staff in Roads construction contractors, PWD, or state R&B

On all aspects of Roads quality, slope, rainwater harvesting, futuristic designs with cable ducts, drains etc. (with no need to redigging it again)

FIT INDIA – ACTIVE INDIA FOR YOUTHFUL ENERGY FOR NATIONS BUILDING.

Vivekanand Student Associations to be established in every city ,village

As Library cum literary cultural organization to encourage youth to study the message of Swamy Vivekananda, other Freedom fighters, to participate in social service acts like swachhbharath

Rainwater harvesting, Van mahotsav, Tree planting, EkBharath SresthBharath, Devotional Music, Traditional Music instruments usage – Members can encouraged to become Vidya volunteers to teach local students in village, or a street under Skill India

This could be extended activities of present NYK (NEHRU YUVA KENDRA)

If any Town can have 1000 members (with some villages youth also around it in 10 km radius) and actively participate for 18 months in Swachhbharat and Vidyavoluteering, vanmahotsav, NSS , NCC etc Govt can give incentive of 50 lakh as incentive and for establishing Sports Associations, Library etc under EkBharath SreshtBharath policy.

Later Govt can encourage such Units and VYAYAM shalas to establish sports Associations of Football, kabaddi volleyballs etc by giving 1 crore + some land on lease in any PSU or Naodaya school etc for daily practice of sports in every Town.

HEALTHY STUDENTS, GREAT VALUES AS PER RAMAKRISHNA PARAMAHAMSA , VIVEKANANDA SATYASAI , LIKE SAINTS ENVISAGED

Policies for Healthy Active Students Life style across country to develop since if character lost every thing in nation is lost.

Now a day's many students from primary to College level becoming addicts to Mobile screens, Mobile games and harmful mobile screen rays causing bad health and students and children losing sleep and facing sleep disorders, hormone imbalances, sedentary life leading to Diabetes etc diseases due to no physical Activity – So Education Department and UGC need to address these issued through corrective measures by increasing sports, games activities.

EkBharathSreshtBharat and Education Ministry can establish National Yoga Service (NYS) in line with NSS, NCC, and National Greencorps in Colleges

Every University can have

- 5 AM Morning Jogging and Fit India Teams --- to encourage students to go early to bed and get at up 4.30 am to do Yoga, Jogging , Physical Exercises etc in College Grounds daily
- In Villages Govt can assist such Teams to establish HanumanVyayamshalas under New Education Policy
- Major Temples can be encouraged to train primary school students in devotional Music Traditional Ancient Bhajans by establish Morning Devotional Service Youth Teams as part of this National Yoga Service.

(To revive Ancient Nagar Samkeerthana Tradition) - to have Youth and Children Teams to get up early at 4.30 am to do Group Meditation, Bhajans in Temples, and later to go around Town or Village for 2 to 4 km singing the Traditional Bhajans, Devotional Song by clapping (claps energize the Mind, make Active and sharp so it helps in Learning skills, Mind control , Focus on Learning skills)

A National Guideline to swichhoff wifi, public wifi , Mobile data in Hostels, Residential Colleges, University campuses by 8.30pm night to reduce Addiction to Mobile games etc and to enable Students to go to sleep by 9.00 pm which helps to get up by 4.30 am

Across Country also Govt can release guidelines to parents to make this as habit since more addiction to Digital games, Mobile screens causing enormous health hazards in Toddlers, children and students due to harmful blue rays from Mobile and Tabs screens.

Dhanyavaad , pranaam OmShanti OmShanti Omshanti
