

Respected and Beloved Prime Minister Shri Narendra Modi ji,

Jai Hind Sir,

Subject: Encourage civilians for donate to 'Defence Development Fund (DDF) for the help of mass production and research programme of advance + hi tech weapons for national security.

Here I am sharing my views on new concept of 'Defence Development Fund (DDF)' with attaching this pdf. I think it is very helpful concept and you may like it for encouraging weapons production and development programme for our armed forces. I feel happy, joy and cheer every time when I read any proudful news about our forces that they were succeed in their mission without any soldier casualties and feel pain that I am not among part of it.

But now I feel glad and proud for sharing my views and discuss about a new concept is **Defence Development Fund (DDF).**

Sir, we are facing so many issues for army, navy and air force weapons production line and defence budget. So, you can generate additional fund via creating '**Defence Development Fund (DDF)**' with help of our civilian's donation and set up for extra weapons manufacturing line for speedy and in time delivery weapons for our armed forces.

It will help in many advantageous conditions and truly required for our various defence programmes like:

1. reduce production timing and unemployment because we can set up and develop 3 to 5 times more production channel line from a current capacity,
2. fast & in time delivery will increase our strength at different strategical places,
3. speed up to invent new advanced weapon technology,
4. helpful for increase export our weapons for generate revenue and reduces burden on budget for provide additional funding to weapons development,
5. at the time of war, production will be not affected because we have already trained labours for excessive manufacturing and advance developed production channel,
6. important point is it reduces our foreign dependency on weapons supply and technology,
7. it will also helpful for increase our full and excessive strength in less period on land, air and water against our enemies like Pakistan and China,
8. with the help of this we might be ensure of our national security improvement,
9. with it's help we can increase our power & strength in other nations for develop military bases to challenge against increasing power of China in Pakistan, Bhutan, Nepal, Tibet, Sri Lanka, Myanmar and importantly in our Indian Ocean also,
10. using these funds, we create an artificial island military, naval and air force bases for an additional surveillance on any unusual activities done in Indian Ocean for quick and fast response at the time of any emergency and war situations because it creates additional power pressure via our additional military presence against our enemies,
11. with it's help we will become a lead manufacturer and supplier in weapons industry and it may increase solid power in world politics and UN,
12. it's create not only new era of weapon industry in India but also create creative advance hi-tech opportunities for our younger brains which help for stop going abroad for earning higher money,
13. with using this fund, we develop our space defence programme for upcoming future and stand by in space with hi-tech military space station using advance hi-tech weapons for protecting our space programmes,
14. with this fund it supports and increase our undercover operations in other countries for getting in time information for our national and international security,
15. this fund helps us for going fast forward in Atmanirbhar Bharat and Make in India mission in defence development programme true and real manner.

🚩 **Who will manage this Fund? And How to attract donors for donate?**

1. Defence Development Fund (DDF) will be jointly managed by Chief of Defence Staff and President of India. Anyone can donate under DDF from 1 rupee to infinite.
2. Government may attract donors via giving additional 80 to 100% income tax saving benefit under Section 80 G for encourage them.
3. For attracting donors Government may plan that every MP and MLA of every states have to compulsory donate 30% of their annual income received because they all are already covered under Section 10(17) of Income Tax Act to exempt to pay any type of income tax (including Prime Minister of India, President and Vice President of India and Governors of all states).
4. It will create patriotic image of our politicians in the entire country to attract and encouraging people of our country for donation.
5. For attracting every people, you may plan that every local MLA and MP of their constituency become a brand ambassador and must have to encourage public for donate under this fund not for politics but for a nation.

🚩 **Who will donate under this fund? And how to raise funds:**

In case of donors are not only individuals but also

1. HUF,
2. Partnership Firms,
3. Private and Public Limited Company,
4. NRIs Individuals,
5. NRIs Company,
6. Charitable Trusts of any religion (here I am suggested that every trust must have to donate 30% of their actual donations received if it's run and managed by religion like Jain, Hindu, Muslims, Christians, Sikhs, Buddhists, etc...),
7. Every State and Union Territory must have to donate up to 3% amount of their monthly income received from regular act and business,
8. Every registered political parties must have to donate 40% of their actual donation received,
9. At the time of increase may encash fund from ceased property, bank balance of Black Money holder, mafia, drug dealers, traitors and terrorist's wealth are very helpful for recover part losses done by them to our nation in past and used in weapons development and research programme.

From the above list Point No. 1 to 3 will be donate under DDF and can take income tax benefit under Section 80 G as per the rule.

Sir, I am very happy if you are working on this idea and discuss in Mann ki Baat programme because I really think and planned for this after a long time to serve my country and it is a good chance to me and every Indian people for write their name across the bullets and missiles for eliminate and destroy our enemies who challenge us on entire border like Land, Air and Water.

At the end I am telling only one thing to is **"Everyone will not become a soldier but everyone will help to encourage and salute their moral, patriotism, enthusiasm towards their passion for serve to nation for its glory and freedom."**

Yours Faithfully,

Vivek Doshi.
