

My Comments and Observations for New Education Policy – Higher Education are as under: -

- Colleges and Universities not allowing an MBA student wanting to do Major in Finance also do Major in Operations and International Business with minor in Agribusiness management even after Swayam Portal and ABC/Academic bank of Credit this seriously hinders students development, kindly allow flexibility in education system.
- Academic Bank of Credit and Swayam Portal are still not fully functional
- Current Education framework is designed to produce cheap labor for factory this is why there is sky high difference between syllabus of IIM, IIT and normal colleges and Universities as Universities and colleges are strangled by AICTE syllabus guidelines. This is nothing less than worse form of Human Rights violation and worst form of abuse. This is causing students life getting destroyed. Apart make IIM PGDM courses available by Distance Education.
- Make single curriculum applicable to all, same subjects should be taught in IIT and IIM as normal Universities and colleges. Dissolve AICTE as it has done maximum possible damage to people of India with its pathetic guidelines. Agnipath scheme riots last year had deep roots in AICTE created mess of biased education policy.
